Subject: Cape Fear River paper

James, Mark:

Excellent paper. I just have a few final comments/suggestions at the beginning of the paper (BC second review).

Ex. 5 Deliberative Process (DP)

The other comments I think may be typos:
Page 6, line 4- of 5 mL 35% nitric acid.²⁶ In brief, One liter of water was
Page 17, Table 4- line 2: more plausible isomers has (have?) no registered CAS number

Let me know what you think. I can do the changes.

Kevin, I am copying you as you are next to see the paper. This is your heads-up. The paper is not in STICS yet. The package has all the reviews, QA form and the fact sheet. I will send it to you after I hear from Mark and James about the suggested edits.
